

Initial important facts - Kafka Operations

- ☑ • Kafka brokers should be up and running
- ☑ • DNS resolution should be available with master nodes from kafka brokers
- ☑ • Kerberos authentication server side and users
- ☑ • Zookeeper nodes should be up
- ☑ • Sentry should be up
- ☑ • TLS and SSL certification verification should be fine
- ☑ • NTP service should be running all brokers
 - ▶ **systemctl status chronyd**
 - ▶ Checking if chrony is Synchronized >> **chronyc tracking**
 - ▶ current time sources that chronyd is accessing >>>>>>> **chronyc sources**
 - ▶ Checking chrony Source Statistics>>> **chronyc sourcestats**
- ☑ • Kafka brokers and Zookeeper port should be telnet
 - ▶ Kafka >> **telnet nttkafkanp003 9092** , **telnet nttkafkanp003 9093**
 - ▶ Zookeeper >> **telnet nttdsaamnp003 2181**
